

## SERVING THE MILITARY COMMUNITY

The Military & Family Support Services (MFS) team specializes in assisting service members, Veterans, and their family members in finding the programming that best meets their needs. MFS liaisons have access to a nationwide network of TRICARE-approved and Veterans Affairs Community Care Network (VA CCN)-contracted facilities that offer a full continuum of behavioral health programming.

Our programming includes multiple levels of care that are designed to treat the whole person and prepare them for their next step, whether the goal is mission readiness, a transition to civilian life, or maintaining recovery, putting each person on the path to a more enjoyable, healthy, and productive life.
